\* upgrade option - purchase of online spare parts

NOTE: Some services may not be available in all areas. Please check with your Panzura sales representative or contact Panzura to confirm service details and pricing.

## Online Support Portal

Panzura provides an online support portal that allows customers to open support cases and manage existing cases. Customers have access to the Panzura knowledge base that provides helpful documentation and solutions.

## Technical Support Priority Levels

Panzura prioritizes all cases according to customer impact using industry standard definitions. During the life of the case, the current priority can be raised or lowered based on the current status of the issues. It is ultimately always the customer's decision about the priority.

Priority	Definition
1	System down, severely degraded performance. Preventing the business from achieving critical business functions.
2	Some service degradation, intermittent outage. Minimal affect on business operations.
3	One-time outage, configuration or other technical question. Performance and job function largely unaffected.
4	Non-technical questions, feature requests, requests for documentation and other non-critical questions.

## Escalation Notification

Panzura takes critical customer issues very seriously, and has an automated escalation process to notify senior managers and the executive staff of any new escalations. Technical escalations to Tier 3 support and development engineering are done quickly to ensure the right resources are engaged as soon as the need is identified.

Time Since Case Was Identified as P1	Support Management	ENG Management	Executive Staff
30 mins	✓	.	.
1 hour	✓	✓	.
2 hours	✓	✓	.
4 hours	✓	✓	✓
